

progressive caring

“*T*hank you from the bottom of my heart.

In 1996 I had the symptoms, but could not believe that I was having a heart attack. Almost immediately upon arrival at

O’Bleness, I was surrounded by the emergency department staff. Things happened fast. The doctors and nurses got me stabilized, ran lots of tests and admitted me to the cardiac care unit for more extensive testing and diagnosis.

I received wonderful care.

They told me I would be transferred to Columbus where I had a heart catheterization and stent placement. My heart doctor told me the team at O’Bleness saved my life. In fact he said, ‘They really know what they’re doing down there in Athens.’

I told everyone what my cardiologist said and how much I appreciated the wonderful care I received. I felt like I had a new lease on life and I still feel that way. A lot of people at O’Bleness had my best interest at heart and I thank them from the bottom of mine.”
